Getting Started

A great place to start your research! You can quickly discover relevant information on any topic from across the library’s collections.

**Search >**

Searching is like searching the open Web, so start with a few keywords. If you are searching for a known item, you might want to try the Advanced Search option.

**Navigate Results >**

Once you have a set of results, there are many options to help you explore topics, narrow your results set, and refine your search query. Recommendations and suggestions for other resources or search terms are also provided.

Based on your search query terms, the Topic Explorer pane may appear on the right providing relevant topical reference content and suggestions for librarians to contact, recommendations for research guides to explore, and more.

Refine using facets and filters to narrow or expand results. Options include discipline, date, content type, subject, and more. Facets may change and get more granular as you navigate your search results.
View Results and Access Content

After you've identified an item of interest, you can access or locate the content, or use other features to further aid you in your research.

### Recommendations for additional resources to explore

<table>
<thead>
<tr>
<th>Database Recommendations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Web of Science - Covers over 10,000 of the highest impact journals worldwide, including Open Access journals and over 110,000 conference proceedings</td>
</tr>
<tr>
<td>Scopus - Citation database of peer-reviewed literature and quality web sources</td>
</tr>
</tbody>
</table>

**1. Chemistry**
by Chang, Raymond

### Or ways to refine your search query

- Substance abuse treatment
- Substance abuse counseling
- Substance abuse prevention
- Substance abuse during pregnancy

Or try including sources outside of this library's collection

**Substance abuse and rehabilitation: electronic resource**

Save citations to a temporary Saved Items folder for citation export, emailing and printing during your session. Or using the buttons in the right pane, cite or email a single item.

View additional information about the item in the right pane by hovering over the title. You can conduct new searches by clicking on the subject, author, or other terms.
